Yilin Wang and
Jill Jacobs
Lindsay Yeager

Perceptions.mov explores the human relationship to the technological devices we use to record, rewind, and playback time. Over the past three months, the artists in this show performed creative experiments with a time-based medium in order to expand their own personal perception of video as a tool for expression. Perceptions.mov is the semester end show of ART385 Video Art, Department of Art, University of Delaware, Instructor: Amy Hicks.
